Step 1 - Access the tutorial to export

On the home page, select the tutorial to be exported as a PDF.

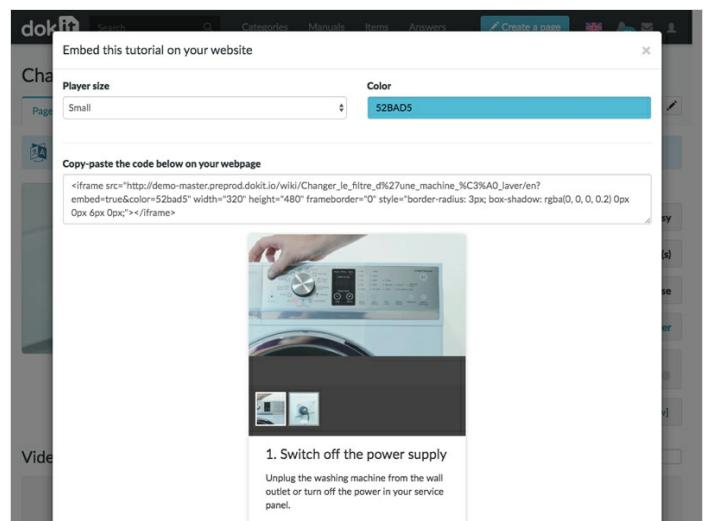

A screenshot of a web-based tutorial management system. At the top, there's a navigation bar with 'Categories', 'Manuals', 'Items', 'Answers', 'Create a page', and other user-related icons. Below the navigation, a specific tutorial titled 'Changer le filtre d'une machine à laver' is displayed. A context menu is open on the right side of the screen, with 'Embed this tutorial' highlighted. Other options in the menu include 'Export PDF', 'Generate a QR code', 'Submit to review', 'Delete', 'Move', 'Protect', 'Watch', 'Refresh', and 'Use'. Below the menu, there are sections for 'Difficulty', 'Duration', 'Area', and 'Business'.

Step 2 - Embed a tutorial into a website

- Once the tutorial is open, click on the dotted icon (top right of the page), then on **Integrate this tutorial**.
- Change the player size, color, and then copy and paste the embed code to put it on your website.

 You can also view the table of contents, the necessary materials and tools, and get an overview of the tutorial.

A screenshot of a 'dokit' interface showing a 'Changer le filtre d'une machine à laver' tutorial. A modal window titled 'Embed this tutorial on your website' is open. It includes settings for 'Player size' (Small) and 'Color' (52BAD5). Below these, there's a section for 'Copy-paste the code below on your webpage' containing an `<iframe>` tag. The main area shows a thumbnail of a washing machine and a step-by-step guide for changing the filter.
