Washing machine door won't unlock?

Jeanne Doe | Posted on Jan 25 at 4:25 pm

My washing machine cycle came to an end. After 3 minutes it is supposed to unlock, but it didn't. It has drained all the water out, so that's not a problem. I turned the power off on the wall, and it still wouldn't unlock. How can I get my wet washing out?

Hello Jeanne, this is a tricky washer. Did you get any error code to pinpoint it to the interlock mechanism or anything? You can try and open the door on the bottom right on the front of the machine.
